Flexographic printing supplies from BFS

BFS Pressroom Solutions Ltd is a family run business established in Berkshire in 1986, and a leading UK manufacturer and a trusted supplier of Flexographic pressroom consumables to the narrow web, wide web, flexible packaging and corrugated markets.

BFS manufactures a diverse range of Flexographic products including rollers and sleeves for various applications including: printing, coating, embossing, nip, infeed and path rollers. Optimum compounds being developed for each product from a broad scope of elastomer compounds.

Innovative thinking and the constant search for new technological advances has placed BFS in a strong position to guide its customers towards well informed decisions when it comes to consumables that are longer lasting, highly effective and ultimately save money.

Whatever your application, BFS can support your team with the most appropriate solutions for your particular machinery and operational needs.

Flexographic roller manufacture and more...

Roller manufacture, new and refurbished

As one of the UK's leading printing roller manufacturers, BFS customers are in good hands.

BFS supplies a complete engineering and manufacturing service enabling you to easily install a finished roller straight into your machine.

All rollers are engineered to either original equipment manufacturers', or your own bespoke specifications.

Rollers are available new or refurbished and all produced in our roller facility in the heart of the UK.

Flexo Sleeves & Tint sleeves

Sleeves are manufactured to order by BFS's own production facility, under its own brand name 'Endura'.

Mewa wipe laundry service

BFS offers an award winning laundered wipes collection and delivery service.

Doctor blades

Both steel, thin ground and next generation plastic blades.

Anilox roller care

Including specialist roller wash for standard and UV inks, as well as specialist Anilox roller brushes.

Cleaning

The most effective, environmentally sustainable, non-toxic, non-corrosive cleaning solutions for plates, rollers and presses.

Plate mounting tape

A wide selection of Lohmann mounting tapes with different foam adhesive formulations and foam hardnesses, for best results.

End seals

BFS end seals are compatible with all types of coatings, eliminating the need to replace them between jobs.
