

## **Roller Exchange Programme**

A programme offered to BFS customers to ensure that your refurbished rollers are available to your presses as quickly as possible

### **How does it work?**

We send you a fully reconditioned roller and split your invoice: one invoice for the rubber and wearing parts and a separate invoice for the core and accessories (reusable parts) - as a refundable deposit.

It is then your responsibility to send back your worn rollers within one month of your order.

Once your returned rollers are received at BFS, we fully inspect them to OEM specifications. These parameters are crucial to the consistent performance of your machinery.

If the return core meets the OEM quality standards, your core & accessories deposit will be credited to your account.

Cores that do not meet the quality standards are disposed of. No credit is given and the cores are replaced so you can be sure that the exchange rollers held in stock for you are as good as new.

### **Key benefits...**

- It's simple and convenient
- There's a substantial time saving
- You don't need to store spare rollers
- Rollers are precisely matched to OEM specification
- Consistently inline with technological advances
- Guaranteed trouble free function
- From the UK's leading print roller experts

### **Address to send rollers:**

BFS Pressroom Solutions, (Rollers) 4 & 5 Lime Grove Industrial Estate,  
Falconer Road, Haverhill, Suffolk, CB9 7XU

**0118 930 5999**
